On May 2, 2005, the Missouri Division of Personnel will implement an electronic application process for select Merit System job classes.

Apply with…

EASe

The Division of Personnel's Electronic Application System

EASe allows faster additions to state merit system registers – immediately in most cases.

Once you've applied through EASe, you can access your application again to update your education and work history – and to apply for other job classes online.

EASe allows you to access and view your active register status anytime.

Applying for a career in Missouri state government just got *easier*
